

**PALLET MASTER 639**

Rexarc's **PALLET MASTER 639** is an adjustable, palletized cylinder distribution system designed to increase distributor efficiencies while decreasing costs.

- Designed to connect to 4, 8, 12 or 16 cylinders
- Does not require dedicated assets
- Portable – move from pallet to pallet without tools
- Manifolds multiple cylinders on demand
- Ease of installation, connection and operation
- Single outlet
- Heavy duty, built for industrial applications
- Designed to work on most pallets
- Infinitely adjustable up to 48 inches
- Reduces labor on cylinder handling
- Reduces safety concerns
- Can be used for Oxygen, Inert and Acetylene (fuel) gases
